

Elvis Ono

Software Developer

elvisonob@yahoo.com | [Github](#) | 07778833743 | Portfolio-website: www.elvisonob.com |
Available for fully onsite or Hybrid | United Kingdom

A technically proficient software developer with hands-on experience and solid foundation in React, JavaScript/TypeScript, and NodeJS. Possesses excellent adaptability and can work efficiently in both team and independent work environments, with a strong drive to master new tech stacks and explore new systems; and committed to bringing ingenuity to your organization.

RELEVANT EXPERIENCE

Boolean

- Design, develop, and maintain front-end user-centric interfaces and server-side architecture that increased user engagement by 25%.
- Participate in all aspects of the software development lifecycle, from requirements gathering to deployment.
- Collaborate with cross-functional teams, including Product, Design, and Backend Engineering, to ensure seamless integration of new features and improvements.
- Participate in code reviews, write clean and maintainable code; identify, and address code performance and debugging issues
- Active participation in stand-ups, Agile, kanban, CI/CD, branching, and pull requests.

SOFTWARE PROJECTS

Animal Simulation App

[Github](#) [Hosted](#)

- An Animal simulation application where users can reduce an Animal's health status, and also increase it by feeding the animal.
- Each animal types have different live thresholds based on their health percentages.
- Technology used: React, React-Router, Custom-Hooks

Shopping App

[Github](#) [Hosted](#)

- A Full stack application which optimizes user's interaction, and items can be added to cart, removed, filtered by use-by dates, and purchased.
- Technology used: React, NodeJS, ExpressJS

EDUCATION HISTORY

Software Academy, UK

A yearlong intensive full-time software development program, where I learned from the basics of programming into building full stack applications.

Robert Gordon University, Aberdeen UK

Master of Science, Engineering

University of Benin

MSc, Electrical and Telecommunications Engineering
Second Class (Upper Division 2:1)

OTHER WORK EXPERIENCE

TrustFord, UK

Project Engineer

Responsibilities

- Successfully implemented a project development plan on distribution
- Developed performance goals and targets to meet customer's demand

TECHNICAL SKILLS

JavaScript
TypeScript
React
Redux
NextJS
NodeJS
ExpressJS
Git
GitHub
SQL and NoSQL database
REST and GraphQL API Creation
TDD(Cypress)
HTML & CSS
Currently building a new Project

SOFT SKILLS

Good team player
Collaborates effectively.
Takes delight in problem solving.
Great Listener.
Attention to detail.
Critical and strategic thinking
Communicates appropriately.
Self-Learning
