Possesses an excellent adaptability with a strong drive to master new tech stacks and explore new systems, and committed to bringing ingenuity to your organization.

## TECHNICAL SKILLS

| | | |
|---|---|---|
| HTML/CSS | NextJS | REST and GRAPHQL API Creation. |
| JavaScript | NodeJS | TDD(Cypress). |
| TypeScript | ExpressJS | Currently building a React Project with |
| React | Git/Github | a NodeJS Backend |
| Redux | SQL and NoSQL Database | |

## CAREER EXPERIENCE

### Software Developer – Boolean, UK                                  2023 - Present

- Design, develop, and maintain front-end user-centric interfaces using React, and server-side architecture with NodeJS, to meet evolving business requirements that increased user engagement by 30%.

- Collaborate and review with cross-functional teams including Technical Lead, Product, Design, Marketing and Business Analysts, to ensure seamless integration of APIs, new features and actively providing solutions to ensure systems are fit for purpose.

- Organized and led a scrum team that turned user requirements into quality software with excellent scalable, reliable, and secure performance which improved efficiency by 35%.

- Participate in all aspects of the software development lifecycle, including design, coding, documentation, requirements gathering, debugging and TDD using Cypress and Jest.

- Active participation in stand-ups, code reviews, Agile, kanban, CI/CD, branching, and pull requests.

### IT Operations Support - TrustFord Group, UK                              2023 - 2024

- Managing and resolving IT Queries.

- Creating and maintaining documentation, including user manuals, technical specifications, and process documentation, and contributing to knowledge sharing initiatives within the IT team.

- Managing relationships with external vendors and service providers, evaluating vendor products and services, and negotiating contracts and agreements.

- Analysing data to identify trends, patterns, and insights that can inform decision-making and drive business value, and preparing reports and presentations to communicate findings.

## PROJECTS

*Quiz Application*                                              *Link to Live-view*     *Link to Github*
- A Quiz application with five straightforward questions where users can select an answer, and at the end of the questions, a detailed summary is provided.
- Technology used: React, React Hooks: useEffect, useState, useRef, useCallBack

*Shopping App*                                                 *Link to Live-view*     *Link to Github*
- A Full stack application which optimizes user's interaction, and items can be added to cart, removed, filtered by use-by dates, and purchased.
- Technology used: React, NodeJS, ExpressJS

## EDUCATION HISTORY

**Full Stack Software Development – Software Academy, UK**                          **2021- 2022**
Certificate of Completion

**Robert Gordon University, Aberdeen UK**                                            **2020 - 2021**
Master of Science, Engineering

**University of Benin**                                                              **2016 - 2018**
Master of Science, Electrical and Electronics Engineering
Second Class Upper (2:1)
