Elvis Ono
Software Developer

elvisonob@yahoo.com | Github | 07778833743 | website: www.elvisonob.com

A technically proficient software developer with hands-on experience in software development, comprising of data structures, front and back-end, with technical skills in JavaScript/TypeScript, React, NodeJS, and an ability to learn and work well with new tech stack.

RELEVANT EXPERIENCE

Boolean, UK

- ➢ Organized and led a scrum team that turned user requirements into quality software with excellent performance and improved productivity by 35%.
- ➢ Delivered technical solutions with clean, well-tested code and documenting solutions, and this improved code readability among team members.
- ➢ Contributed to the entire development life cycle including software testing.
- ➢ Participate in code reviews , identify, and address code performance and debugging issues to create an unparalleled user experience
- ➢ Active participation in stand-ups, agile, kanban, CI/CD, branching, and pull request.

SOFTWARE PROJECTS

Shopping App   GitHub Hosted

- A shopping app which optimizes user's interaction, and items can be added to cart, removed, and filtered by use-by dates.
- Used Front-end development technologies including JavaScript, React
- Challenges included creating a good UX experience and using Dates

Current Time Checker   GitHub Hosted

- A Time checker application which provides users with the current time of three major cities in a 12-hour format.
- Used technologies such as an external API to retrieve information.
- Challenges included using React custom-hooks and the right HTTP link for project deployment.

EDUCATION HISTORY

Boolean UK – Software Academy
2021 – 2022

A yearlong intensive full-time software development program, where I learned from the basics of programming into building a full stack application.

Robert Gordon University, Aberdeen UK
2020 – 2021
Master of Science, Engineering

University of Benin, Benin-City
2016 – 2018
MSc, Electrical and Telecommunications Engineering
Second Class (Upper Division 2:1)

OTHER WORK EXPERIENCE

Amazon Center, Edinburgh UK
Project Engineer
Jan 2021 – Oct 2021
Responsibilities

-Successfully implemented a project development plan on distribution

- Developed performance goals and targets to meet customer's demand

TECHNICAL SKILLS
JavaScript
TypeScript
React
Redux
NextJS
NodeJS
ExpressJS
Git
GitHub
SQL and NoSQL database
REST and GRAPHQL API Creation
TDD
Currently learning Jest unit testing

SOFT SKILLS
Good team player
Collaborator
Problem Solver
Great Listener
Pays attention to details.
Critical thinking
Communication skills
Self-Learning
